Oregon, USA

## **WORK EXPERIENCE**

Intel Corporation Software Developer                      Aloha, Oregon                      May 2018 – Present

- Developed, tested (integration and unit tests), debugged, and documented software applications.
- Collaborated with application stakeholders to define application scopes and objectives.
- Coached multiple junior developers and new application stakeholder on the software development process and their respective roles.
- Developed a cloud hosted web application which introduced an automated/controlled solution for processing complicated recipes that define how tools operate.

Intel Corporation Software Intern                      Hillsboro, Oregon                      May 2017 – Aug 2017

- Developed data analysis tool that facilitates faster information synchronization across team, increasing communication efficiency as well as establishing a central repository for information acquired in subject area.
- Performed software maintenance, testing and development of new features for internal tool, which automated previous manual operations.
- Conducted research and analysis of legacy code related to benchmark calculations on server platform memory configurations, work provided insight and opportunities to evaluate new memory technologies.

AT&T Sales Consultant                      Hurst, Texas                      Sept 2009 - Aug 2016

- Consistently met or exceeded monthly targets, while maintaining a 95% customer satisfaction rating.
